Please add 5% Sales Tax to total purchase price for delivery within Pennsylvania. **KINDLY REMIT IN UNITED STATES DOLLARS ONLY AND DRAWN ON A UNITED STATES BANK, IF NOT U.S. RESIDENT.**

COIN DETECTOR[®]

is a Registered Trademark with the United States Patent Office . . . a gauge and registry card for numismatic study and identification of coins and medals.

A new departure to meet the needs of discriminating collectors, curators and dealers who want to “detect” and protect their valuable collections with a 3x5 inch record and inventory card system.

It provides full details for . . .

1. Physical characteristics of obverse, reverse and edge, graphically shown on a clock dial.
2. Date, mint, purchase price and date, weight, millimeter measurement and other details.
3. An I.D. card for insurance and police reports in case of loss. The handy transparent “clock” gauge with millimeter scale, pin-points details for entry on cards.

Why Guess?

Be Sure!

GAUGE — The purpose of the plastic gauge is to determine the location of identifying marks or defects on any one of 12 segments on the obverse and reverse of coins and medals.

Simply center the gauge over item to be registered with the aid of the convenient millimeter scale and transfer specific characteristics to the registry card.

REGISTRY CARD — This card contains blocks, numbered clockwise, for entry of Characteristics Coding shown on the card. Space is also provided for notes relating to edges of coins and medals.

It is suggested that colored pencil markings be used to show toning colors in relative position on the “clock” of the obverse or reverse side. Die breaks, oddities and varieties can also be sketched. Special notes and your own coding can be developed and entered on the reverse side of the card.

Widely acclaimed and serving useful purposes from coast to coast. Establish your pedigree file now!

\$3.50 for Transparent Gauge and 100 Cards

Extra Cards — \$2.00 per 100. Gauge — \$1.50.
